## Student Learning Outcomes

Students who complete a certificate in Project Management will be able to:

1. effectively perform project team member and leadership roles in the full spectrum of project management ranging from small, single to large, complex and multiple projects;
2. present the fundamentals of project management based on a project life cycle;
3. introduce and explain widely used tools of basic project management;
4. examine the roles of the project manager and project team members;
5. explore a best-practices approach to planning and managing projects of any size;
6. improve the performance of traditional project management with innovative new tools;
7. introduce new and practical approaches for managing today's non-traditional projects;
8. align projects within an organizational framework and with the business strategy;
9. review and apply PMI's Project Management Body of Knowledge (PMBOK); and
10. implement enterprise-level project portfolio and program management.
