

Schools

Charter Oak State College is proud to announce the launch of its first academic school—the School of Education—marking a significant milestone in our continued growth and commitment to academic excellence. This newly established School represents the beginning of a strategic vision to organize our programs into focused areas of study that support students more directly in their educational and career goals.

The creation of the School of Education is the first step in an exciting evolution for Charter Oak. In the coming years, additional Schools of Study will be developed to further enhance the academic experience, foster specialized communities of learning, and provide clearer pathways to degree and career success.

We invite you to be a part of this transformative moment at Charter Oak—where your goals are our mission, and your success is our purpose.
