

## **Undergraduate Double Concentration**

General Studies students who have the potential and interest may be accepted for study into two separate Concentrations. Students will only receive one degree (either a B.A. or a B.S. as appropriate) upon completion of the two concentrations. Students will have to complete the capstone course in each concentration. A maximum of 9 credits can be used in both concentrations. The student's official transcript will list both concentrations

Any student who wishes to pursue two concentrations must consult with their advisor and complete the "Declare a Second Concentration" form prior to the start of a semester.

\*A second concentration in the General Studies major is not considered a double major.
